一颗电子仿真眼球，植入眼窝内使用。它可以拍摄和录制影像，并自动通过周围设备将内容加密上传到分布式云端。

An artificial electronic eyeball, implanted in the eye socket, can capture photos and record videos, automatically encrypting the content and uploading it to the distributed cloud via surrounding devices.

震动产生声音，这已经是现代科学常识，而这个装置试着把声音转换为震动。在这个过程中，可以看到声音现象并非单向的，而是对称的。另外，接受声音的物体的自身状态规定了它能接收到的声音频率。这些现象让人联想到人与人的沟通。
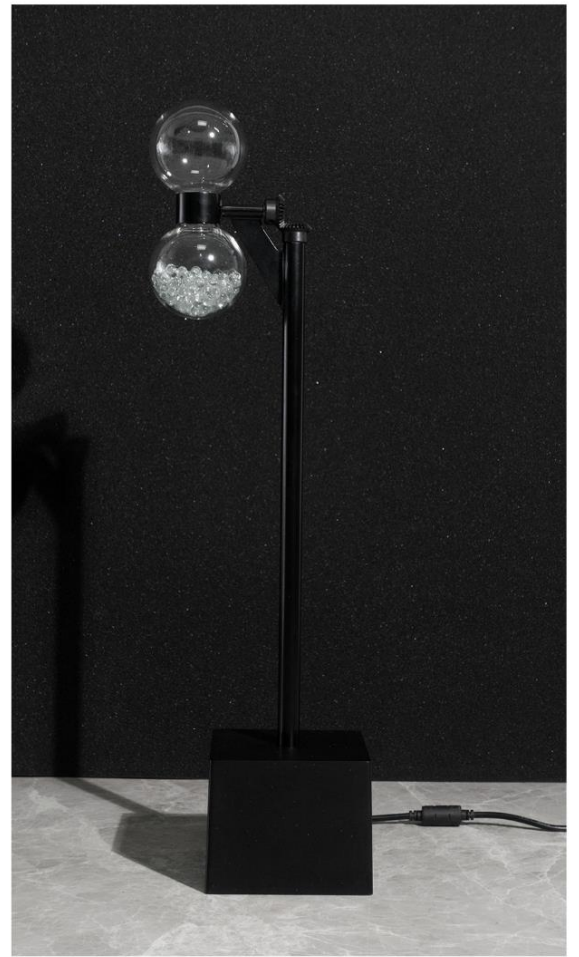

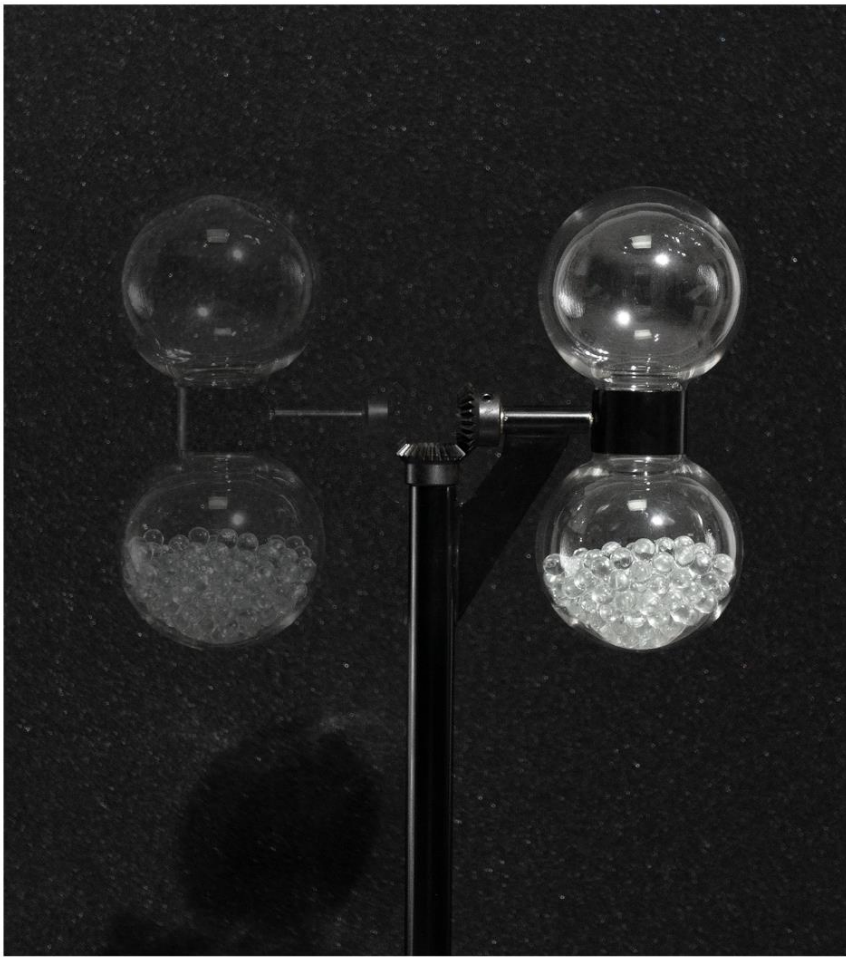

It is common knowledge in modern science that vibration produces sound, and this device tries to convert sound into vibration. In this process, it can be seen that the sound phenomenon is not unidirectional, but symmetrical. Also, the state of the object receiving the sound specifies the sound it can receive. These phenomena are reminiscent of human communication.

沙漏每一次翻转，会随机地将一颗珠子阻隔在中间通道，然而被视作整体的珠群并不会被觉察到变化，好像每颗珠子都不重要。像这样大量个体被组成群组，而每一个个体都可有可无，那么群组是否真实存在？

The hourglass randomly blocks a pearl in the middle passage with each flip of the hourglass, yet the cluster of pearls is not perceived as changing, as if each pearl is unimportant. With multiple individuals being formed into clusters in this way, and each one dispensable, is the cluster real?

假如把自然的人比作向量，那么他有四个力量：有、大小、方向以及生成繁衍。他是钢铁，本是自己和金子的主人，却拿自己兑换别人口中的黄金，直到别人拥有更多钢铁，成为他和金子的主人。

If we consider a natural person as a vector, he possesses four forces: existence, magnitude, direction, and the power of generation. He is like steel, originally the master of both himself and gold, yet he trades himself for the gold spoken of by others, until those others accumulate more steel and become the master of both him and the gold.

你知道，
这个世界的你已经死了。

当感受和看见分离，看见和知道分离，知道和行动分离，
人和实在分离。

When feeling is separated with seeing, seeing is separated with knowing, knowing is separated with acting, then we are separated with reality.

存在着，但不是我所看到的任何东西。
存在着，什么都不是，什么都可以是。
存在着，在存在的边缘。

Being, but not anything that I can see.
Being, it is nothing, yet it can be anything.
Being, on the edge of existence.
